

Tula Measurement Activities

(reported by Gustavo Sosa)

March 22 Status Update:

1. Today we are moving to Tula: two mobile units (SO₂, O₃, NO, NO₂, CO and meteorological parameters at 10 m), VOC, aldehydes, PM₁₀ and PM_{2.5} samplers.
2. A Radiosonde system is working since last Saturday launching four radiosondes per day at: 8, 12, 15 and 18 hrs.
3. A DOAS system will be moved at Melchor Ocampo site (see map) this weekend. This equipment measures: SO₂, O₃, Toluene, Benzene and Xylene
